The Advanced Response Police Officer Course is designed to provide the police officer with enhanced training, skills, and techniques to survive ambush and unexpected threat situations. Focusing on practical application of skills learned, this course is conducted primarily in the field or on the range. It is designed for any police officer wanting to enhance their survivability in any environment. Topics include the use of various pieces of equipment, tactical movement, tactical combat casualty care, live fire drills, scenario based decision-making, rescues, and counter-ambush tactics.

LEARNING OBJECTIVES

- Fundamentals of tactical movement
- Ballistic shield operations
- Mechanical breaching
- Interior building clearing tactics for two and three-man teams
- Tactical movement in open air and urban environments
- Tactical Emergency Casualty Care (TECC)
- Officer/Citizen down rescues
- Counter-ambush survival tactics
